# What's Your Problem: Concept Sketch

Name:

**Concept sketches** are labelled drawings that show how an invention or idea would work.Designers often use sketching and drawing to think through the details of ideas.

Draw a concept sketch of your AI solution. Label your sketch with information about:

- What would this solution look like?
  - What is the AI tool doing?
  - What actions are humans taking?

- What problem are you solving?
- How could you represent the data that the AI tool uses?
